Proceedings of the Institution of Mechanical Engineers

Volume 198, 1984

The letter preceding each page number refers to the relevant Part of the Proceedings as follows:

Part A Power and Process Engineering
Part B Management and Engineering Manufacture
Part C Mechanical Engineering Science
Part D Transport Engineering

Author Index

Abam, D P S Computation of the aero-thermodynamic field of laminar diffusion flames C175
Adler, G F W Fitness for purpose B1
Alexander, W D Thermally insulated diesel engines A97
Alvi, M S The theoretical and photoelastic investigation of stresses in chassis frame joints D63
Anderson, J S Sonic flow through an abrupt change in cross-section C197
Andersson, E The development of advanced high speed vehicles in Sweden D229
Anderton, D Evolution and design principles of low noise, lightweight engines A121
Likely advances in mechanics, cooling, vibration and noise of automotive engines D95
Ashton, E W S Changes required in British Industry B83
Atherton, J Mechanical engineering design decisions: instances of practice compared with theory B87

Badi, M N M Oscillatory instabilities generated in a double-pin and disc undamped system: a mechanism of disc brake squeal C43
Batchelor, J Applications of fibre reinforced plastic composites in the railway industry D43
Belbin, G R Thermoplastic structural composites — a challenging opportunity B71
Bick, D E A history of the Dowty marshalling yard wagon control system B19; *(discussion)* B207; *(author's reply)* B207
Birtwisle, R J Braking of articulated vehicles and the advantages of anti-wheel lock devices D223
Black, J J Falklands Campaign D187
Boada, F Reduction of pumping losses by the use of a variable valve timing system D295
Botham, G J M 25 kV electrical multiple unit for the Kowloon–Canton Railway (British section) D51
Bottomley, D The Ford 3 × 6 engine programme D301
Brown, A Experience gained in constructing and commissioning two medium sized wind turbines A141
Brown, A J Financing major export contracts B203
Bryant, D Assessment of flash vessel design A89
Burrows, C R Estimation of linearized oil-film parameters from the out-of-balance response C131
Byrne, K P The use of limp porous blanket baffles to control acoustic vibration in crossflow tubular heat exchangers A289

Cartwright, P A Health and safety legislation and engineers B175
Chandler, D Experience in using computer aided design and draughting equipment in the mining manufacturing industry B109
Charlton, S J Radioisotope techniques for problem-solving in the chemical industry A81
Charlton, S J A study of highly turbocharged high-speed diesel engines A231
Chiu, P C Temperature transients in a triple heat exchanger C145
Cole, A Thermally insulated diesel engines A97
Colyer, C C Tailoring oils to engines D69
Corfield, K Getting the engineers we need B243
Cox, S J The dynamic response of railway track with flexible sleepers to high-frequency vertical excitation D117
Croll, J G A Axisymmetric elastic–plastic buckling of axial and pressure loaded cylinders C243

Dale, B G A A study of audits, inspection and quality costs in the pressure vessel fabrication sector of the process plant industry B45
A study of quality assurance in small businesses B135
Datta, B N Study of drift in an asymmetric linear hydraulic motor B209
Dawson, P H Windage loss in larger high-speed gears A51
Day, A J Combined thermal and mechanical analysis of drum brakes D287
The dissipation of frictional energy from the interface of an annular disc brake D201
Dixon, J Evolution and design principles of low noise, lightweight engines A121
Dominy, J A Aerodynamic influences on the performance of the Grand Prix racing car D87
Dominy, R G Aerodynamic influences on the performance of the Grand Prix racing car D87
Dorey, R E Computer aided design of split power hydrostatic transmission systems B61
The mathematical modelling of hydrostatic pumps and motors B165
Duncalf, A J A study of quality assurance in small businesses B135

Earles, S W E Oscillatory instabilities generated in a double-pin and disc undamped system: a mechanism of disc-brake squeal C43
Eaton, W M The Selby coalfield — a new concept for an old industry A241
Edge, K A Digital computer simulation as an aid in improving the performance of positive displacement pumps with self-acting valves B267
Edwards, J B The effect of large-scale structures on the stability of coal-face steering A29
Edwards, M Industrial robots: a human factors perspective B239
Evans, E M Measurement of the aerodynamic and rolling resistances of road tanker vehicles from coast-down tests D211

© IMechE 1984

Fung, E H K Temperature transients in a triple heat exchanger C145

Garber, M Theoretical prediction and experimental substantiation of the ground pressure distribution and tractive performance of tracked vehicles D265
Ghlaim, K H System prediction using damped component modes C261
Giblin, J Duct inspection and repair programme for Magnox nuclear power reactors A301
Gill, H The search for good solutions — what skills are required of the designers? B153
Gohar, R The use of various types of pressure element in some elastic contact problems C189
Gondhalekar, V Design of a radial electro-magnetic bearing for the vibration control of a supercritical shaft C235
Goodison, H Developments in the handling and sorting of parcels and packets B27; *(discussion)* B207; *(author's reply)* B208
Gordelier, S C Condition monitoring in the CEGB — some future requirements for tribology related problems A13
Goulas, A Performance characteristics of centrifugal pumps when handling non-Newtonian homogeneous slurries A41
Grant, J C Electrification of surburban railway routes through the city of Dublin D253
Grassie, S L The dynamic response of railway track with flexible sleepers to high-frequency vertical excitation D117
Gross-Thebing, A High-frequency contact mechanics: the derivation of frequency-dependent creep coefficient C167
Grover, E C Evolution and design principles of low noise, lightweight engines A121
Guldenpenning, A U W The German Federal Railway Class 120 three-phase drive system: service trials D125

Hager, W H An approximate treatment of flow in branches and bends C63
Harding, P R J Combined thermal and mechanical analysis of drum brakes D287
Hargreaves, D J An experimental and theoretical study of lubricant film extent and flowrate in grooved rectangular pad slider thrust bearings C225
Harris, F R The Parsons Centenary — a hundred years of steam turbines A183
Hay, N Effect of reducing the blade cooling air temperature and mass flow on blade life and cycle efficiency A225
Henly, H R The impact of microprocessors on postal mechanization control systems B159
Hill, J The problems of new technologies in a rapidly changing energy scene A107
Hinduja, S Modelling the characteristics of interface surfaces by the finite element method C9
Hollings, J S Variety in transport engineering D189
Hollocks, B W Cost effective engineering through simulation A135
Holmes, R Design of a radial electromagnetic bearing for the vibration control of a supercritical shaft C235
Hooke, C J End plate balance in gear pumps B55
Horlick, T Naval engineering achievements in the liberation of the Falklands D177

Ismail, H S A technique of introducing the characteristics of interface joints in the computer aided design of drop hammers B117

Johnson, W A theoretical analysis of the bending into cylindrical dies of metal strips C99
Stamping rectangular plates into doubly-curved dies C109
The large elastic deflection of thin strips in V-die bending and the onset of plasticity C1
Junker, G H The bolted joint: economy of design through improved analysis and assembly methods B255

Kao, T K Thermally insulated diesel engines A97
Kelly, A G A plan to reduce forged outages in power stations A1
Khare, A K Structural error synthesis of a four-bar function generator using the reliability concept C87
King, C S A car for the nineties: BL's energy conservation vehicle D21
Knothe, K High-frequency contact mechanics: the derivation of frequency-dependent creep coefficient C167
Koc, E End plate balance in gear pumps B55
Kubie, J Axisymmetric outflow from large vessels A113

Lalor, N Evolution and design principles of low noise, lightweight engines A121
Lang, A The preservation and starting from cold of large oil-fired generating plant A71
Leahy, J C Digital computer simulation as an aid in improving the performance of positive displacement pumps with self-acting valves B267
Leonard, R Optimizing the financial advantage of using CNC machine tools by use of an integrated suite of programs B147
The development and application of a computer based appraisal technique for the structured evaluation of machine tool purchases B141
Lewis, G K The stiffness and static stability of compensated hydrostatic cylindrical-pad bearings C285
Lindley, D The 250 kW and 3 MW wind turbines on Burgar Hill, Orkney A149
Lingard, S Estimation of flash temperatures in dry sliding C91
Low, M B J Condition monitoring in the CEGB — some future requirements for tribology related problems A13
Lucas, G G The motor car in the year 2000 D83

McCabe, T I Variations B219
McCallion, H On machine perception of the relative position of two objects using bilateral tactile sensing systems B179
McCandlish, D The mathematical modelling of hydrostatic pumps and motors B165
McFadden, P D Acoustic emission transducers for the vibration monitoring of bearings at low speeds C127
Macián, V Reduction of pumping losses by the use of a variable valve timing system D295
McNeil, J H 25 kV electrical multiple unit for the Kowloon–Canton Railway (British section) D51
Malik, M Externally-pressurized gas-lubricated floating-ring porous journal bearings Part 1: steady state analysis C213
The dynamical behaviour of externally pressurized gas-lubricated unloaded porous journal bearings C33
Theoretical considerations of molecular mean free path influenced slip in self-acting gas-lubricated plain journal bearings C25
Markatos, N C The computation of thick axisymmetric boundary layers and wakes around bodies of revolution C51
Martin, K F System prediction using damped component modes C261
Massey, C T The Selby coalfield — a new concept for an old industry A241
Meakins, E J Variations B219
Meier, G E A Sonic flow through an abrupt change in cross-section C197

© IMechE 1984

Mellor, R W Motor vehicle design engineering in the UK D77
Millward, A A method of predicting the effect of the dissolved gas content of water on cavitation inception C163
Montague, P The strength–instability interaction of double-skinned composite circular shells under external pressure C293
Morgan, G Computer controlled pneumatic servo drives B275
Mortimer, R G A study of the braking performance of motorcyclists with an integrated braking system D129
Mostofi, A The use of various types of pressure element in some elastic contact problems C189
Murray, J D The design, construction and installation of a continuous casting plant for the production of special steel billets at Stocksbridge Works A161
Murty, A S R Study of drift in an asymmetric linear hydraulic motor B209
Muster, D The relevance of analysis and synthesis in management and engineering education B37

Nash, T The strength–instability interaction of double-skinned composite circular shells under external pressure C293
Naylor, P A method of predicting the effect of the dissolved gas content of water on cavitation inception C163
Nee, A Y C Computer aided layout of metal stamping blanks B187
Neumann, J Control of warship machinery D137
Newcomb, T P Combined thermal and mechanical analysis of drum brakes D287
The dissipation of frictional energy from the interface of an annular disc brake D201
Nilstam, N The development of advanced high speed vehicles in Sweden D229

Payri, F Reduction of pumping losses by the use of a variable valve timing system D295
Pearce, T R A A comparison of oil and water as grinding fluids in the creep feed grinding process B229
Pearson, A W Project management in engineering R and D B131
Pham, D T On machine perception of the relative position of two objects using bilateral tactile sensing systems B179
Piggott, J Developments in the handling and sorting of parcels and packets *(discussion)* B207
Platt, A the preservation and starting from cold of large oil-fired generating plant A71
Plunkett, J J A study of audits, inspection and quality costs in the pressure vessel fabrication sector of the process plant industry B45
Polak, P Review of keyway design considerations C209
Pollard, M G Passenger comfort — the role of active suspensions D161
Preston-Thomas, J Theoretical prediction and experimental substantiation of the ground pressure distribution and tractive performance of tracked vehicles D265
Priede, T Evolution and design principles of low noise, lightweight engines A121
Likely advances in mechanics, cooling, vibration and noise of automotive engines D95
Primrose, P L Optimizing the financial advantage of using CNC machine tools by use of an integrated suite of programs B147
The development and application of a computer based appraisal technique for the structured evaluation of machine tool purchases B141

Qureshi, T B Arbitrary motions in long cylindrical squeeze films: numerical model and experimental validation C137

Rao, A C Structural error synthesis of a four-bar function generator using the reliability concept C87
Rao, S S Error analysis of cam-follower systems: a probabilisitic approach C155
Ravenhall, E N A French perspective on the cost effective maintenance of passenger coaching stock D107
Rees, D W A A multi-surface representation of anisotropic hardening and comparisons with experiment C269
Rodkiewicz, C M The dynamical behaviour of externally pressurized gas-lubricated unloaded porous journal bearings C33
Rogers, R J Arbitrary motions in long cylindrical squeeze films: numerical model and experimental validation C137

Sadek, M M A technique of introducing the characteristics of interface joints in the computer aided design of drop hammers B117
Sahinkaya, M N Estimation of linearized oil-film parameters from the out-of-balance response C131
Senior, C H The preservation and starting from cold of large oil-fired generating plant A71
Sheldon, D F The search for good solutions — what skills are required of the designer? B153
Sher, E The effect of atmospheric conditions on the performance of an air-borne two-stroke spark-ignition engine D239
Sherry, A The power game — the development of conventional power stations 1948–1983 A257
Shima, A The collapse of a gas bubble near a solid wall by a shock wave and the induced impulsive pressure C81
Sierens, R Comparison of measured and calculated gas velocities in the inlet channel of a single cylinder reciprocating engine A61
Simons, N J A Passenger comfort — the role of active suspensions D161
Sinha, G L Study of drift in an asymmetric linear hydraulic motor B209
Smith, J D Acoustic emission transducers for the vibration monitoring of bearings at low speeds C127
Energy loss in gear tooth impact C205
Snauwaert, P Comparison of measured and calculated gas velocities in the inlet channel of a single cylinder reciprocating engine A61
Souch, D J W Making for export D33
Sousa, A C M Arbitrary motions in long cylindrical squeeze films: numerical model and experimental validation C137
Stojek, F The Ford 3 × 6 engine programme D301
Stronge, W J Stamping rectangular plates into doubly-curved dies C109
Swinbanks, M A The active control of noise and vibration and some applications in industry A281

Takahashi, K The collapse of a gas bubble near a solid wall by a shock wave and the induced impulsive pressure C81
Tarabad, M Thermally insulated diesel engines A97
Taylor, B J Stratified flow of liquids in steeply sloping pipes A317
Taylor, C M An experimental and theoretical study of lubricant film extent and flowrate in grooved rectangular pad slider thrust bearings C225
Taylor, J H Effect of reducing the blade cooling air temperature and mass flow on blade life and cycle efficiency A225

Tebay, R Mechanical engineering design decisions: instances of practice compared with theory B87
Tidbury, G H The theoretical and photoelastic investigation of stresses in chassis frame joints D63
Tombs, F The way ahead for manufacturing industry B249
Tomita, Y The collapse of a gas bubble near a solid wall by a shock wave and the induced impulsive pressure C81
Turner, D L A history of the Dowty marshalling yard wagon control system *(discussion)* B207

Vafidis, C Influence of induction swirl and piston configuration on air flow in a four-stroke model engine C71
Van Hove, W Comparison of measured and calculated gas velocities in the inlet channel of a single cylinder reciprocating engine A61
Vaughan, N D Computer aided design of split power hydrostatic transmission systems B61
Villanueva-Leal, A Modelling the characteristics of interface surfaces by the finite element method C9

Walker, C I Performance characteristics of centrifugal pumps when handling non-Newtonian homogeneous slurries A41
Wallace, F J Thermally insulated diesel engines A97
Wallace, P W The bolted joint: enconomy of design through improved analysis and assembly methods B255
Waller, J A Challenge, change and commitment D1
Warby, D J Preparing the offer B195
Ware, D K London Transport's 1983 tube stock D153
Wearne, S H Contractual responsibilities for the design of engineering plant: a survey of practice and problems B97
Health and safety legislation and engineers B175
Mechanical engineering design decisions: instances of practice compared with theory B87
Weekes, W H The relevance of analysis and synthesis in management and engineering education B37
Weston, R H Computer controlled pneumatic servo drives B275
Wilson, J E Applications of fibre reinforced plastic composites in the railway industry D43
Wilson, R G Modernization of control systems to maintain plant reliability and economy in a flexible operating regime A7
Wilson, R R Experience gained in constructing and commissioning two medium sized wind turbines A141
Wong, J Y Theoretical prediction and experimental substantiation of the ground pressure distribution and tractive performance of tracked vehicles D265
Wronski, G Modernization of control systems to maintain plant reliability and economy in a flexible operating regime A7

Ye, N E A comparison of oil and water as grinding fluids in the creep feed grinding process B229
Yeoh, C C The effect of droplet size on the flow in the last stage of a one-third scale model low-pressure turbine A309
Young, J B The effect of droplet size on the flow in the last stage of a one-third scale model low-pressure turbine A309
Yu, T X A theoretical analysis of the bending into cylindrical dies of metal strips C99
Stamping rectangular plates into doubly-curved dies C109
The large elastic deflection of thin strips in V-die bending and the onset of plasticity C1

Zemroch, P J Measurement of the aerodynamic and rolling resistances of road tanker vehicles from coast-down tests D211
